② The program is divided up in this way because the responsibilities are all divided up and everyone knows what to do. The boss know what everyones jobs are. Each section has certain parts and about the same amount of work. It is divided to be the most efficient

③ We rats all have strengths and weaknesses. We divided the program up into to parts that each of us may be better at. We individually ran tests on our code to make sure it worked. Since I was the one turning it in, I consolidated all the code and ran the final tests on the program to make sure it worked correctly.
